

Live broadcast the current situation on field

By sharing the situation of the site with live broadcast, things that are difficult to communicate with words, accurate information sharing is possible by video + voice. You can share video very smoothly anywhere in the world.

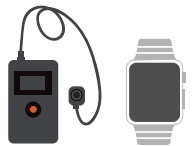

Recommended industries

- | | | | | | |
|--------------|-------------|---------|-----------|----------|--------------------|
| Airline | Warehouse | Railway | Logistics | Factory | Energy |
| Construction | Maintenance | Taxi | Plant | Retail | Security |
| Track | Restaurant | Event | Care | Hospital | Manufacture etc... |

Wearable cameras and also planned to support smart watches!

You can use Buddycom with a wearable camera fixed to the chest of your uniform or by fixing it to a helmet.

Usage scene

SECURITY

Custom-order uniforms with a "smartphone case" on their chests, allowing them to simultaneously monitor the security site at the center.

MAINTENANCE

The center's skilled staff can give detailed guidance to young employees and overseas field work while watching live video.

PLANT

Share the situation in real time with LIVE video. You can communicate with offices and headquarters far away from site as if you were on the spot.

TRACK

The status of the track after an earthquake or trouble can be broadcast, and the center can check the details in real time and check again later.

Livecast is one of the plans for Buddycom

Buddycom is a smartphone App for professional people in the field.

There is no need for troublesome procedures and application for licenses, and the calling area extends to the world. Since it can be used simultaneously with other business applications, it can reduce the cost and improve business efficiency.
